

Global Performance Monitor (GPM) Upgrade to Lyons Quality Audit Tracking System (LQATS) Released

View real-time product quality performance across your entire manufacturing enterprise on a single screen.

Easy visual evaluation of your entire enterprise's quality performance.

GPM provides a worldwide picture of your company's health, accurately, quickly and real-time. See all of your sites and their performance using any web browser with an internet connection.

© Lyons Information Systems, Inc. 2007 All Rights Reserved

The number of plant sites that may be viewed is unlimited.

Customize Your View

Choose which manufacturing plant sites to monitor and display. Each site is automatically displayed from the LQATS auditing system where audit and inspection data is entered. Sites may be grouped for consistent evaluation as a group.

Drill-Down Performance

Click on a site icon to display recent quality assessment performance. Change the graph and export the data into a convenient file format.

Detail Your View

Select a group of sites to view performance summaries. Select how often to poll quality performance and set red, yellow and green performance limits.

Set Your Parameters

You set:

- Performance Levels
- Icons for Plant Groups
- Plant Code Designations
- Database Polling Time
- User Access

One customer commented:
**“There’s almost no need
for reports any more!”**
